EDUCATION

Bachelor of Applied Science in Mechanical Engineering

May 2024

University of British Columbia

Vancouver, British Columbia

WORK EXPERIENCE

Product Manager

July 2025 – Present

Critical Environment Technologies

Delta, British Columbia

- Established CET's end-to-end product innovation and delivery system using Jira Product Discovery tools, prioritizing 130+ feature ideas and 40+ bugs across five product lines to drive cross functional alignment
- Implemented agile practices and engineering KPIs, improving engineering throughput by ~19% over 17 sprints and accelerating time-to-market, contributing to a feature that generated ~\$400K in annual revenue
- Owned and presented CET's 2026 product roadmap to 100+ customers at AHR Las Vegas, synthesizing customer and market feedback to into OKR linked roadmap and backlog prioritization decisions
- Launched a web-based system configurator integrated with Microsoft Business Central, reducing configuration time by 75% through iterative UX scoping with Lovable, ERP data modeling, and design management; led development post-launch, implementing AI-assisted regression testing and a ticketing system to triage and fix bugs
- Conceived and led a \$140K redesign of an explosion-proof gas detector, defining roadmap and PRD, conducting structured discovery across 20+ customer interviews, 3 customer segments, and achieving a ~71% reduction in cost
- Led full go-to-market strategy and execution, including market segmentation, pricing, positioning, sales enablement and cross-functional coordination, projected to drive a 200% sales increase in the first quarter
- Designed and delivered code-compliant product packages, bundling CET and white-labeled hardware into 6+ comprehensive solutions that reduced quoting friction, simplified compliance, and strengthened CET's positioning

Application Engineer

August 2024 – July 2025

Critical Environment Technologies

Delta, British Columbia

- Delivered 1,700+ system quotations and supported 200+ technical calls, developing deep understanding of customer pain points, application requirements, and cost-performance tradeoffs in gas detection system design
- Designed 100+ system layouts and wiring diagrams using AutoCAD and Revu, translating regulatory requirements and technical constraints into deployable, application-specific solutions that accelerated deal progression
- Facilitated 15+ technical demos with engineers, technicians and distribution partners, expanding qualified installer capacity and increasing product adoption across partner channels

Online Community Manager

May 2022 – Aug 2022

Autonomy Network

Remote

- Generated \$10K+ in B2B and B2C revenue by building and executing targeted cold email and Twitter outreach campaigns, qualifying leads through discovery calls, and closing new client accounts
- Built and scaled ambassador and outreach programs, onboarding **50+ participants**, and tracking performance through a structured point system to increase brand visibility and online growth

PROJECTS AND ACHIEVEMENTS

Product Manager and Lead Developer

January 2025 – April 2025

Amazon ShopSmart

Vancouver, British Columbia

- Led zero-to-one development of an AI-powered Amazon product comparison web app, conducting **100+ user surveys** to define MVP and delivering a scoring algorithm that generates data-driven purchase recommendations
- Designed and shipped full-stack solution using Figma, Python, Flask, JS, HTML/CSS, that extracts product data, synthesizes review signals, and reduces manual comparison effort through AI-generated summaries

SKILLS

Core Competencies: Product Strategy, Stakeholder Management, Go-to-Market Strategy, Cross-Functional Leadership, OKR Development, User Research and Discovery, Agile Frameworks, Prototyping,

PM Tools: Jira Product Discovery, Jira, Confluence, Microsoft Planner, Figma, MagicPatterns, Notion, Lovable

Analytics: Excel, KPI Development, PowerBI, Microsoft Business Central (ERP)

Programming: Python, Flask, JavaScript, HTML/CSS, C++
